# Report on Internal Control Over Financial Reporting

The Association's principal executives and principal financial officers, or persons performing similar functions, are responsible for establishing and maintaining adequate internal control over financial reporting for the Association's Consolidated Financial Statements. For purposes of this report, "internal control over financial reporting" is defined as a process designed by, or under the supervision of the Association's principal executives and principal financial officers, or persons performing similar functions, and effected by its Board of Directors, management and other personnel. This process provides reasonable assurance regarding the reliability of financial reporting information and the preparation of the Consolidate Financial Statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

Internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Association, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial information in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures are being made only in accordance with authorizations of management and directors of the Association, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Association's assets that could have a material effect on its Consolidated Financial Statements.

The Association's management has completed an assessment of the effectiveness of internal control over financial reporting as of June 30, 2013. In making the assessment, management used the framework in *Internal Control — Integrated Framework*, promulgated by the Committee of Sponsoring Organizations of the Treadway Commission, commonly referred to as the "COSO" criteria.

Based on the assessment performed, the Association concluded that as of June 30, 2013, the internal control over financial reporting was effective based upon the COSO (1992) criteria. Additionally, based on this assessment, the Association determined that there were no material weaknesses in the internal control over financial reporting as of June 30, 2013.

# Management's Discussion and Analysis of Financial Condition and Results of Operations

*(dollars in thousands)*

The following commentary reviews the financial condition and results of operations of Farm Credit of Florida, ACA, (Association) for the period ended June 30, 2013. These comments should be read in conjunction with the accompanying consolidated financial statements, notes to the consolidated financial statements and the 2012 Annual Report of the Association. The accompanying consolidated financial statements were prepared under the oversight of the Audit Committee of the Board of Directors.

Effective January 1, 2011, Farm Credit of North Florida and Farm Credit of Southwest Florida merged into Farm Credit of South Florida. The merged associations operate under the name of Farm Credit of Florida. The primary reason for the merger was based on a determination that the combined organization would be financially and operationally stronger than either of the associations on a stand-alone basis. The merger was accounted for under the acquisition method of accounting.

Additional information regarding the merger and the related impact to the Association's financial condition is contained in Note 7 of the Notes to the Consolidated Financial Statements.

The Association's CEO, Don Rice, retired during the month of November 2012. Effective November 5, 2012, the Board of Directors appointed Greg Cunningham the Association's Chief Executive Officer.

## **LOAN PORTFOLIO**

The Association provides funds to farmers, rural homeowners and farm-related businesses for financing of short and intermediate-term loans and long-term real estate mortgage loans. The Association's loan portfolio is diversified over a range of agricultural commodities in the north and southern regions of Florida, including cattle, citrus, dairy, field crops, nurseries, sugar, timber, tropical fruits and vegetables. All commodity groups found in the portfolio have experienced generally favorable operating results with the exception of nursery which continues to be stressed. Farm size varies and many borrowers have diversified farming operations. This factor, along with numerous opportunities for non-farm income in the territory, reduced the level of dependency on a single agricultural commodity.

Land values in the north region appear to have stabilized over the last 12 months. Land values in the south region show stability with value increase in more urban areas. There have been no significant weather events in the territory that have adversely impacted borrower operations.

The gross loan volume of the Association as of June 30, 2013, was \$802,739, a decrease of \$7,048 as compared to \$809,787 at December 31, 2012. Net loans outstanding at June 30, 2013, were \$791,324 as compared to \$798,021 at December 31, 2012, a decrease of \$6,697 or 0.84 percent. Net loans accounted for 91.43 percent of total assets at June 30, 2013, as compared to 89.29 percent of total assets at December 31, 2012. The association has a significant level of adverse assets. The decrease in both gross and net loan volume during the period is primarily attributed to scheduled repayments in the loan portfolio as well as liquidation of assets in process of collection.

There is an inherent risk in the extension of any type of credit. Portfolio credit quality has improved compared to year end 2012 as a result of the movement of loans from Substandard to OAEM. Acceptable and OAEM credit quality as a percentage of the total loan portfolio was 84.23% as of June 30, 2013 compared to 82.61% at December 31, 2012. During the six months, nonaccrual loans decreased to \$85,455 from the \$92,871 balance at December 31, 2012. The nonaccrual loan decline is primarily attributed to liquidation of loans in process of collection. The balance of Other Property Owned at June 30, 2013 was \$6,293 a decrease of \$5,937 from the \$12,230 balance at December 31, 2012. Sales of properties outpaced acquisitions during the period resulting in this decrease.

Association management maintains an allowance for loan losses in an amount considered sufficient to absorb possible losses in the loan portfolio based on current and expected future conditions. The allowance for loan losses at June 30, 2013, was \$11,415 compared to \$11,766 at December 31, 2012. This decrease is the result of recoveries of \$3,662 recorded during the period offset by a provision for loan loss reversal of \$533 and \$3,480 in charge-offs recorded on loans transferred to nonaccrual or other property owned. Management considers the current level of allowance adequate to cover additional possible losses. The ratio of the allowance for loan losses to gross loans at June 30, 2013 was 1.42 percent.

## RESULTS OF OPERATIONS

As a result of the merger on January 1, 2011, \$551.5 million in non-impaired loans were purchased at a combined discount of approximately \$30.3 million. In accordance with accounting guidance, this discount is to be accreted into interest income over the remaining life of each individual loan. For loans that are paid off early, any remaining discount would be accreted into income at time of pay off. The discount amount accreted into interest income for the six months ended June 30, 2013, was \$2,543.

### ***For the three months ended June 30, 2013***

The Association recorded net income for the three months ended June 30, 2013 of \$4,882 as compared to \$1,744 for the same period in 2012. This \$3,138 increase is primarily attributed to a reduction in provision for loan losses resulting from significant recoveries during the quarter of prior charge-offs and slower decline in collateral values requiring less charge-offs offset by a reduction in net interest income resulting from reduced loan volume. The significant recoveries during the quarter ended June 30, 2013 resulted in recording a reversal of provision for loan losses of \$1,358 for the quarter.

Net interest income before provision for loan losses was \$6,746 for the three months ended June 30, 2013 as compared to \$8,082 during the same period in 2012. The change in net interest income represents a 16.53 percent decrease when compared to the same period last year and is attributed to the decrease in loan volume during the past 12 months.

Noninterest income for the three months ended June 30, 2013, totaled \$2,984 as compared to \$4,208 for the same period of 2012, a decrease of \$1,224 or 29.09 percent. This decrease is attributed primarily to decreases in patronage earnings of other Farm Credit institutions with which we participate loans of \$411, decreases in loan fees of \$269 along with a one-time Farm Credit Insurance Fund refund of \$1,235 received in 2012 as explained below. These decreases were offset by decreases in losses on sale of other property owned of \$534.

Noninterest expense for the three months ended June 30, 2013, increased \$552 or 9.70 percent compared to the same period of 2012. The primary reasons for the increase in noninterest expense are attributed to \$325 increase in salaries and employee benefits, and \$140 increase in other operating expenses.

In 2012, the Association recorded \$1,235 of insurance premium refunds from the Farm Credit System Insurance Corporation (FCSIC), which insures the System's debt obligations. The amount is reflected in Noninterest Income on the Consolidated Statements of Income. These payments are nonrecurring and resulted from the assets of the Farm Credit Insurance Fund exceeding the secure base amount as defined by the Farm Credit Act.

### ***For the six months ended June 30, 2013***

Net income for the six months ended June 30, 2013, totaled \$6,983 compared to a net loss of \$2,325 for the same period in 2012, an increase of \$9,308 or 400.34 percent. The increase is primarily attributed to a significant reduction in provisions for loan losses during the period offset by a reduction in net interest income resulting from reduced loan volume. The decrease of \$14,442 in provisions are primarily due to a significant reduction in charge-offs of non-performing loans during 2013 compared to the same period last year, increased recoveries of amounts previously charged-off and lower levels of reserves required due to improving risk profile as a result of improved credit quality. This resulted in recording a reversal of the provision for loan losses of \$533 for the six months ended June 30, 2013.

Net interest income decreased \$3,118 for the six months ended June 30, 2013, as compared to the same period in 2012. This decrease is attributed to the decreased loan volume over the last 12 months and reduction in the amount of discounts accreted into income related to loan payoffs during prior year periods.

Noninterest income for the six months ended June 30, 2013, totaled \$6,041 as compared to \$6,537 for the same period of 2012, a decrease of \$496 or 7.59 percent. This decrease is attributed to decreases in equity earnings from AgFirst Farm Credit Bank of \$658, decreases in loan fees of \$644 along with a one-time Farm Credit Insurance Fund refund of \$1,235 received in 2012 as previously explained. These decreases were offset by a significant decrease in losses on other property owned of \$1,572 and increases of \$433 in other noninterest income.

Noninterest expense for the six months ended June 30, 2013, increased \$1,557 compared to the same period of 2012. The primary reasons for the increase is attributed to additional staffing cost increases totaling \$1,190 related to nonperforming loan disposition. Additional increases were realized in other operating expenses of \$212, occupancy and equipment expense of \$51, and insurance fund premiums of \$104.

## FUNDING SOURCES

The principal source of funds for the Association is the borrowing relationship established with AgFirst Farm Credit Bank (the Bank) through a General Financing Agreement. The General Financing Agreement utilizes the Association's credit and fiscal performance as criteria for establishing a line of credit on which the Association may draw funds. These funds are advanced by the Bank to the Association in the form of notes payable. The notes payable are segmented into variable rate and fixed rate sections. The variable rate note is utilized by the Association to fund variable rate loan advances and operating funds requirements. The fixed rate note is used specifically to fund fixed rate loan advances made by the

Association. The total notes payable to the Bank at June 30, 2013, was \$653,918 as compared to \$688,853 at December 31, 2012. The decrease during the period of \$34,935 is primarily attributed to the reduction in loan volume during the period and fluctuations in the usage of borrower SmartCash accounts. SmartCash accounts, a voluntary additional conditional payment fund, which are offset against the related loan outstanding in the portfolio, can influence fluctuations in volume and notes payable with the Bank. SmartCash balances at June 30, 2013 were \$2,604 as compared to \$3,600 at December 31, 2012. Additional SmartCash funds, held in Other Liabilities against commitment balances totaled \$5,182 as of June 30, 2013 as compared to \$2,796 at year-end.

## **CAPITAL RESOURCES**

Total members' equity at June 30, 2013, increased to \$192,788 from the December 31, 2012 total of \$187,389. The increase is primarily attributed to the net income during the period.

Total capital stock and participation certificates were \$2,859 on June 30, 2013, compared to \$3,105 on December 31, 2012. This decrease is attributed to the retirement of protected stock and participation certificates on loans liquidated in the normal course of business.

Farm Credit Administration (FCA) regulations require all Farm Credit institutions to maintain minimum permanent capital, total surplus and core surplus ratios. These ratios are calculated by dividing the Association's permanent capital, total surplus and core surplus as defined in FCA regulations, by a risk-adjusted asset base. As of June 30, 2013, the Association's total surplus ratio and core surplus ratio were 19.93 percent and 18.78 percent, respectively, and the permanent capital ratio was 20.81 percent. All three ratios were well above the minimum regulatory ratios of 7.00 percent for permanent capital and total surplus ratios and 3.50 percent for the core surplus ratio.

## **REGULATORY MATTERS**

As previously disclosed, on June 15, 2012 the Farm Credit Administration (FCA) entered into a written supervisory agreement with the Board of Directors of the Association. The written supervisory agreement requires the Association to take corrective actions and other actions with respect to certain areas of its operations, including board governance, director fiduciary duties and standards of conduct, board consultant functions, staffing and succession planning, asset quality, collateral risk, allowance for loan losses, internal audit, board policies, compliance with requirements of the Financial Assistance Agreement, and business planning and reporting. In addition, the Association is operating under Supervisory Conditions of Merger and must maintain compliance with all requirements and conditions.

Conditions and events that led to the need for this agreement include portfolio credit quality deterioration, inadequate management succession and human capital planning, perceived weaknesses in board governance, and reduced earnings.

As of August 7, 2013, the Association has taken action to correct the weaknesses in its board operations and policies, asset quality, collateral risk, capital contingency planning, credit policy direction and guidance, internal audit and management reporting, has conducted a staffing study and has adopted a human capital and succession plan.

On May 20, 2013, FCA communicated in a letter to the Board that Board and management actions resulted in significant improvements in direction and control, particularly in the areas of human capital and succession planning, strategic planning, and board policy direction. The Association has achieved full compliance in the areas of board policies, management reporting and disclosure to shareholders.

As required by the supervisory agreement, the Board will continue engaging an independent consultant to provide advice in understanding and fulfilling its fiduciary responsibilities and to perform other advisory functions as specified in the agreement. Both the Board and Senior Management are committed to continuing the administration of the Association in a sound manner.

On November 5, 2012, FCA communicated in a letter to the Board that the Association was found to be in violation of its Supervisory Conditions of Merger and the Supervisory Agreement as a result of an internal cost allocation that did not occur as required by the Financial Assistance Agreement with the Bank. The internal cost allocation does not impact the consolidated financial results presented in these financial statements. The Board took prompt corrective action by submitting a plan to the FCA to address the violation within 15 days of the date of the FCA letter and as of December 31, 2012, the Association had addressed the internal cost allocation violation.

The Association remained under written supervisory agreement as of the date of this report.

Please refer to Note 7, *Business Combination*, in the Notes to the Consolidated Financial Statements for additional information on the Financial Assistance Agreement with the Bank.

## **OTHER MATTERS**

Charles R. Thomas was elected to the Board of Directors effective May 2013 for a three year term. Mr. Thomas is a Florida native, graduate of the University of Florida and current resident and business owner in Suwannee County. He manages 750 acres of timber, is a restaurant owner, automobile

---

dealer, rental property owner, and a real estate developer. Mr. Thomas is a member of the Credit/Lending Committee and his current term of office is 2013 – 2016.

Ron St. John resigned from the Board of Directors effective May 2013. Effective May 2013, Arthur Sandlin completed his term and as stated in the merger agreement, his Board seat was eliminated as part of the downsizing plan of the Board.

## **RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS**

Please refer to Note 1, *“Organization, Significant Accounting Policies, and Recently Issued Accounting Pronouncements”*, in the Notes to the Financial Statements, and the 2012 Annual Report to Shareholders for recently issued accounting pronouncements.

---

**Note:** Shareholder investment in the Association is materially affected by the financial condition and results of operations of AgFirst Farm Credit Bank. Copies of AgFirst’s annual and quarterly reports are available upon request free of charge by calling 1-800-845-1745, ext. 2832, or writing Susanne Caughman, AgFirst Farm Credit Bank, P. O. Box 1499, Columbia, SC 29202. Information concerning AgFirst Farm Credit Bank can also be obtained at their website, [www.agfirst.com](http://www.agfirst.com). Copies of the Association’s annual and quarterly reports are also available upon request, free of charge, by calling (561)-965-9001, or writing Laura Craker, CFO, Farm Credit of Florida, ACA, P. O. Box 213069, West Palm Beach, FL 33421, or accessing the website, [www.farmcreditfl.com](http://www.farmcreditfl.com). The Association prepares a quarterly report within 40 days after the end of each fiscal quarter, except that no report need be prepared for the fiscal quarter that coincides with the end of the fiscal year of the institution.

# Notes to the Consolidated Financial Statements

*(dollars in thousands, except as noted)  
(unaudited)*

## **NOTE 1 – ORGANIZATION, SIGNIFICANT ACCOUNTING POLICIES, AND RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS**

The accompanying financial statements include the accounts of Farm Credit of Florida, ACA (the Association). A description of the organization and operations of the Association, the significant accounting policies followed, and the financial condition and results of operations as of and for the year ended December 31, 2012, are contained in the 2012 Annual Report to Shareholders. These unaudited second quarter 2013 consolidated financial statements should be read in conjunction with the 2012 Annual Report to Shareholders.

The accompanying consolidated financial statements contain all adjustments necessary for a fair presentation of the interim financial condition and results of operations and conform with generally accepted accounting principles (GAAP) and prevailing practices within the banking industry. The results for the six months ended June 30, 2013, are not necessarily indicative of the results to be expected for the year ending December 31, 2013.

Certain amounts in the prior period's consolidated financial statements may have been reclassified to conform to the current period's consolidated financial statement presentation. Such reclassifications had no effect on the prior period net income or total capital as previously reported.

The Association maintains an allowance for loan losses in accordance with GAAP. The loan portfolio is reviewed quarterly to determine the adequacy of the allowance for losses. As of June 30, 2013, the allowance for losses is adequate in management's opinion to provide for possible losses on existing loans.

### **Recently Issued Accounting Pronouncements**

In February 2013 the FASB issued Accounting Standards Update (ASU) 2013-04, "Liabilities (Topic 405): Obligations Resulting from Joint and Several Liability Arrangements for which the Total Amount of the Obligation Is Fixed at the Reporting Date," which addresses the recognition, measurement and disclosure of certain obligations including debt arrangements, other contractual obligations, and settled litigation and judicial rulings. The amendments are to be applied retrospectively to all prior periods presented for those obligations resulting from joint and several liability arrangements within the Update's scope that exist at the beginning of an entity's fiscal year of adoption. An entity may elect to use hindsight for the comparative periods (if it

changed its accounting as a result of adopting the amendments in the Update) and should disclose that fact. The amendments are effective for public entities for fiscal years, and interim periods within those years, beginning after December 15, 2013. For nonpublic entities, the amendments are effective for fiscal years ending after December 15, 2014, and interim periods and annual periods thereafter. Early application is permitted. It is not anticipated the adoption of this guidance will have a material impact on the Association's financial condition or results of operations but will result in additional disclosures.

In February 2013 the FASB issued ASU 2013-02, "Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income." The update is intended to improve the transparency of reporting reclassifications out of accumulated other comprehensive income. The amendments do not change the requirements for reporting net income or other comprehensive income in financial statements. However, the amendments require an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under U.S. GAAP that provide additional detail about those amounts. For public entities, the amendments are effective prospectively for reporting periods beginning after December 15, 2012. For nonpublic entities, the amendments are effective prospectively for reporting periods beginning after December 15, 2013. Early application is permitted.

In January 2013, the FASB issued ASU 2013-01 "Balance Sheet (Topic 210): Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities." The Update clarifies that ordinary trade receivables and payables are not in the scope of ASU 2011-11, "Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities." Specifically, ASU 2011-11 applies only to derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset in accordance with specific criteria or subject to a master netting arrangement or similar agreement. The effective date is the same as that for ASU 2011-11 below.

In December 2011, the FASB issued ASU 2011-11, "Balance Sheet (Topic 210) - Disclosures about Offsetting Assets and Liabilities." The guidance requires an entity to disclose information about offsetting and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. This includes the effect or potential effect of rights of setoff associated with an entity's recognized assets and recognized liabilities. The requirements apply to recognized financial instruments and derivative instruments that are offset in accordance with accounting guidance and for those recognized financial instruments and derivative instruments that are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset or not. This guidance is to be applied retrospectively for all comparative periods and is effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. The adoption of this guidance, in conjunction with ASU 2013-01 above, will not impact the Association's financial condition or its results of operations, but will result in additional disclosures.

Other recently issued accounting pronouncements are discussed in the 2012 Annual Report to Shareholders.

## NOTE 2 — INVESTMENT SECURITIES

The Association's investments consist primarily of asset-backed securities (ABSs). These ABSs are issued through the Small Business Administration and are guaranteed by the full faith and credit of the United States government. They are held for managing short-term surplus funds and reducing interest rate risk. These securities meet the applicable Farm Credit Administration (FCA) regulatory guidelines related to government agency guaranteed investments.

Mission related investments consist primarily of Rural America Bonds, which are private placement securities purchased under the Mission Related Investment program approved by the FCA. In its Conditions of Approval for the program, the FCA considers a Rural America Bond ineligible if its investment rating, based on the internal 14-point risk rating scale used to also grade loans, falls below 9.

A summary of the amortized cost and fair value of investment securities held-to-maturity follows:

	June 30, 2013				
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Yield
Mission-related investments	\$ 9,419	\$ 571	\$ (179)	\$ 9,811	5.83%
Asset-backed securities	16,520	350	(102)	16,768	0.31
Total	\$ 25,939	\$ 921	\$ (281)	\$ 26,579	2.31%

	December 31, 2012				
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Yield
Mission-related investments	\$ 9,493	\$ 1,540	\$ (7)	\$ 11,026	6.12%
Asset-backed securities	19,435	212	(298)	19,349	0.45
Total	\$ 28,928	\$ 1,752	\$ (305)	\$ 30,375	2.31%

A summary of the contractual maturity, amortized cost and estimated fair value of investment securities held-to-maturity follows:

	June 30, 2013		
	Amortized Cost	Fair Value	Weighted Average Yield
In one year or less	\$ 50	\$ 48	-12.52%
After one year through five years	7,439	7,327	-0.02
After five years through ten years	6,707	6,864	0.96
After ten years	11,743	12,340	4.63
Total	\$ 25,939	\$ 26,579	2.31%

A substantial portion of these investments have contractual maturities in excess of ten years. However, expected maturities for these types of securities will differ from contractual maturities because borrowers may have the right to prepay obligations with or without prepayment penalties.

An investment is considered impaired if its fair value is less than its cost. The following tables show the fair value and gross unrealized losses for investments that were in a continuous unrealized loss position aggregated by investment category at each reporting period. A continuous unrealized loss position for an investment is measured from the date the impairment was first identified.

	June 30, 2013			
	Less than 12 Months		12 Months or Greater	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Mission-related investments	\$ 3,514	\$ (142)	\$ 86	\$ (37)
Asset-backed securities	2,767	(17)	3,832	(85)
Total	\$ 6,281	\$ (159)	\$ 3,918	\$ (122)

	December 31, 2012			
	Less than 12 Months		12 Months or Greater	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Mission-related investments	\$ 116	\$ (7)	\$ -	\$ -
Asset-backed securities	430	(10)	11,571	(288)
Total	\$ 546	\$ (17)	\$ 11,571	\$ (288)

The Association performs periodic credit reviews, including other-than-temporary impairment analyses, on its investment securities portfolio. The objective is to quantify any future possible loss of principal or interest due on each security identified for additional analysis. Factors considered in determining whether an impairment is other-than-temporary

include among others: 1) the length of time and the extent to which the fair value is less than cost, 2) adverse conditions specifically related to the industry, 3) geographic area and the condition of the underlying collateral, 4) payment structure of the security, 5) ratings by rating agencies, 6) the credit worthiness of bond insurers, and 7) volatility of the fair value changes. Based on the results of all analyses, the Association has not recognized any other-than-temporary impairment as the unrealized losses result from non-credit related factors. The Association does not intend to sell these investments and it is

not more likely than not that the Association would be required to sell these investments before recovering its costs. It has the ability and intent to hold these investments until a recovery of unrealized losses occurs, which may be at maturity, and at this time expects to collect the full principal amount and interest due on these securities. A substantial portion of these investments were in U. S. government agency securities and the Association expects these securities would not be settled at a price less than their amortized cost. All securities continue to perform at June 30, 2013.

### NOTE 3 – LOANS AND ALLOWANCE FOR LOAN LOSSES

A summary of loans outstanding at period end were as follows:

	June 30, 2013	December 31, 2012
Real estate mortgage	\$ 537,742	\$ 532,126
Production and intermediate-term	240,011	246,886
Agribusiness		
Loans to cooperatives	128	325
Processing and marketing	12,061	14,629
Farm-related business	8,792	9,888
Total agribusiness	20,981	24,842
Rural residential real estate	4,005	5,933
<b>Total Loans</b>	<b>\$ 802,739</b>	<b>\$ 809,787</b>

The Association may purchase or sell participation interests with other parties in order to diversify risk, manage loan volume, and comply with Farm Credit Administration regulations. Participation loan balances at period end were as follows:

	June 30, 2013							
	Within AgFirst District		Within Farm Credit System		Outside Farm Credit System		Total

A restructuring of a debt constitutes a troubled debt restructuring (TDR) if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. The following tables present additional information regarding TDRs as of the restructuring date that occurred during the periods presented. The table does not include purchased credit impaired loans.

Processing and marketing	2,641	3,157	2,641	3,157
Farm-related business	(5)	(6)	(5)	(6)
Total agribusiness	2,636	3,151	2,636	3,151
Rural residential real estate	11	1,085	11	1,085
Total Loans	\$ 35,898	\$ 35,202	\$ 31,854	\$ 31,248

Additional commitments to lend to borrowers whose loans have been modified in troubled debt restructurings was \$417 and \$0 at June 30, 2013 and December 31, 2012, respectively.

### Purchased Credit Impaired Loan Disclosures

The Association acquires loans individually and in groups or portfolios. For certain acquired loans that experienced deterioration in credit quality between origination and acquisition, the amount paid for the loan will reflect this fact. At acquisition, each loan is reviewed to determine whether there is evidence of deterioration of credit quality since origination and if it is probable that the Association would be unable to collect all amounts due according to the loan's contractual terms. If both conditions exist, the purchaser determines whether each such loan is to be accounted for individually or whether such loans would be assembled into pools of loans based on common risk characteristics (credit score, loan type, and date of origination, for example). Considerations of value should include expected prepayments, the estimated amount and timing of

undiscounted expected principal, interest, and other cash flows (expected at acquisition) for each loan and the subsequently aggregated pool of loans. Any excess of the loan's or pool's scheduled contractual principal and contractual interest payments over all of the cash flows expected at acquisition is an amount that should not be accreted to income (nonaccretable difference). The remaining amount, representing the excess of the loan's cash flows expected to be collected over the amount paid, is accreted into interest income over the remaining life of the loan or pool (accretable yield).

Accounting guidance requires that the purchaser continue to estimate cash flows expected to be collected over the life of the loan or pool. It then evaluates at the balance sheet date whether the present value of its loans, determined using the effective interest rate, has decreased and if so, recognizes a

loss. For loans or pools that are not accounted for as debt securities, the present value of any subsequent increase in the loan's or pool's actual cash flows or cash flows expected to be collected is used first to reverse any existing valuation allowance for that loan or pool. For any remaining increases in cash flows expected to be collected, or for loans or pools accounted for as debt securities, a purchaser adjusts the amount of accretable yield recognized on a prospective basis over the loan's or pool's remaining life.

Valuation allowances for all purchased impaired loans reflect only those losses incurred after acquisition, that is, the present value of cash flows expected at acquisition that are not expected to be collected. Valuation allowances are established only subsequent to acquisition of the loans.

The carrying amounts of loans acquired in a 2011 business combination included in the balance sheet amounts of loans receivable at June 30, 2013, were as follows.

	<b>June 30, 2013</b>	
Real estate mortgage	\$	10,449
Production and intermediate-term Agribusiness		3,019
Farm-related business		(5)
Total agribusiness		(5)
Rural residential real estate		106
<b>Total Loans</b>	<b>\$</b>	<b>13,569</b>

At June 30, 2013, the allowance for loan losses related to these loans was \$40 compared with \$443 at December 31, 2012. During the three and six month periods ended June 30, 2013, provision for loan losses on these loans was an expense reversal of \$173 and \$861, respectively, compared with expense of \$45 and \$305 for the three and six month periods ended June 30, 2012, respectively. See above for a summary of changes in the total allowance for loan losses for the period ended June 30, 2013. There were no loans acquired during 2013 or 2012 for which it was probable at acquisition that all contractually required payments would not be collected.

Certain of the loans acquired by the Association in the 2011 business combination that were within the scope of purchased impaired loan guidance are accounted for using a cash basis method of income recognition because the Association cannot reasonably estimate cash flows expected to be collected. Substantially all of the loans acquired were real estate collateral dependent loans. The real estate market in Florida was extremely unstable, making the estimation of the amount and timing of a sale of loan collateral in essentially the same condition as received upon foreclosure indeterminate. As such, the Association did not have the information necessary to reasonably estimate cash flows expected to be collected to compute a yield. Management determined a nonaccrual classification would be the most appropriate and that no income would be recognized on these loans as is allowed under accounting guidance. These amounts are included in the carrying values, net of allowance, described above.

#### NOTE 4 – EMPLOYEE BENEFIT PLANS

The following is a table of retirement and other postretirement benefit expenses for the Association:

	<b>For the three months ended June 30,</b>		<b>For the six months ended June 30,</b>	
	<b>2013</b>	<b>2012</b>	<b>2013</b>	<b>2012</b>
Pension	\$ 891	\$ 874	\$ 1,782	\$ 1,749
401(k)	113	90	227	173
Other postretirement benefits	107	90	214	181
<b>Total</b>	<b>\$ 1,111</b>	<b>\$ 1,054</b>	<b>\$ 2,223</b>	<b>\$ 2,103</b>

The following is a table of retirement and other postretirement benefit contributions for the Association:

	<b>Actual YTD Through 6/30/13</b>	<b>Projected Contributions For Remainder of 2013</b>	<b>Projected Total Contributions 2013</b>
	Pension	\$ 22	\$ 3,442
Other postretirement benefits	141	162	303
<b>Total</b>	<b>\$ 163</b>	<b>\$ 3,604</b>	<b>\$ 3,767</b>

Contributions in the above table include allocated estimates of funding for multi-employer plans in which the Association participates. These amounts may change when a total funding amount and allocation is determined by the Plan's Sponsor Committee. Also, market conditions could impact discount rates and return on plan assets which could change contributions necessary before the next plan measurement date of December 31, 2013.

Further details regarding employee benefit plans are contained in the 2012 Annual Report to Shareholders.

#### NOTE 5 – FAIR VALUE MEASUREMENT

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability.

Accounting guidance establishes a fair value hierarchy for disclosure of fair value measurements to maximize the use of observable inputs, that is, inputs that reflect the assumptions market participants would use in pricing an asset or liability based on market data obtained from sources independent of the reporting entity. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

Estimating the fair value of the Association's investment in the Bank and Other Farm Credit Institutions is not practicable because the stock is not traded. The net investment is a

requirement of borrowing from the Bank and is carried at cost plus allocated equities in the accompanying Consolidated Balance Sheets. The Association owns 4.12 percent of the issued stock of the Bank as of June 30, 2013 net of any reciprocal investment. As of that date, the Bank's assets totaled \$28.1 billion and shareholders' equity totaled \$2.3 billion. The Bank's earnings were \$232 million for the first six months of 2013. In addition, the Association has an investment of \$4,258 related to other Farm Credit institutions.

Management determines the Association's valuation policies and procedures. The Bank performs the majority of the Association's valuations, and its valuation processes are calibrated annually by an independent consultant. The fair value measurements are analyzed on a quarterly basis. For other valuations, documentation is obtained for third party information, such as pricing, and periodically evaluated alongside internal information and pricing that is available.

The classifications of the Association's financial instruments within the fair value hierarchy are as follows:

#### **Level 1**

Level 1 inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets. The Association's Level 1 assets at June 30, 2013 consist of assets held in trust funds related to deferred compensation plans. The trust funds include investments in securities that are actively traded and have quoted net asset value prices that are directly observable in the marketplace. For cash, the carrying value is primarily utilized as a reasonable estimate of fair value.

#### **Level 2**

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets; quoted prices in markets that are not active; and inputs that are observable, or can be corroborated, for substantially the full term of the asset or liability. The Association has no Level 2 assets and liabilities measured at fair value on a recurring basis at June 30, 2013.

For investment securities, the fair value is determined by discounting the expected future cash flows using appropriate interest rates for similar assets.

#### **Level 3**

Level 3 inputs to the valuation methodology are unobservable and supported by little or no market activity. Valuation is determined using pricing models, discounted cash flow methodologies, or similar techniques, and could include significant management judgment or estimation. Level 3 assets and liabilities also could include instruments whose price has been adjusted based on dealer quoted pricing that is different than the third-party valuation or internal model pricing.

Because no active market exists for the Association's accruing loans, fair value is estimated by discounting the expected future cash flows using the Association's current interest rates at which similar loans currently would be made to borrowers with similar credit risk. The loan portfolio is segregated into pools of loans with homogeneous characteristics based upon repricing and credit risk. Expected future cash flows and interest rates reflecting appropriate credit risk are separately determined for each individual pool.

Fair values of loans in a nonaccrual status are estimated to be the carrying amount of the loan less specific reserves. Level 3 assets include impaired loans which represent the fair value of certain loans that were evaluated for impairment under FASB guidance. The fair value was based upon the underlying collateral since these were collateral-dependent. When the value of the collateral, less estimated costs to sell, is less than the principal balance of the loan, a specific reserve is established. The fair value measurement process uses independent appraisals and other market-based information, but in many cases it also requires significant input based on management's knowledge of and judgment about current market conditions, specific issues relating to the collateral and other matters.

The notes payable are segregated into pricing pools according to the types and terms of the loans (or other assets) which they fund. Fair value of the notes payable is estimated by discounting the anticipated cash flows of each pricing pool using the current rate that would be charged for additional borrowings. For purposes of this estimate it is assumed the cash flow on the notes is equal to the principal payments on the Association's loan receivables. This assumption implies that earnings on the Association's interest margin are used to fund operating expenses and capital expenditures.

For investment securities, the fair value is determined by discounting the expected future cash flows using extrapolated interest rates for similar assets.

Other property owned is classified as a level 3 asset. The fair value is generally determined using formal appraisals of each individual property. These assets are held for sale. Costs to sell represent transaction costs and are not included as a component of the fair value of other property owned. Other property owned consists of real and personal property acquired through foreclosure or deed in lieu of foreclosure and is carried as an asset held for sale, which is generally not its highest and best use. These properties are part of the Association's credit risk mitigation efforts, not its ongoing business. In addition, FCA regulations require that these types of property be disposed of within a reasonable period of time.

For commitments to extend credit, the estimated market value of off-balance-sheet commitments is minimal since the committed rate approximates current rates offered for

commitments with similar rate and maturity characteristics; therefore, the related credit risk is not significant.

The following tables present the changes in Level 3 assets and liabilities measured at fair value on a recurring basis for the periods presented. The Association had no transfers of assets or liabilities into or out of Level 1 or Level 2 during the periods presented.

	<b>Standby Letters Of Credit</b>

## INFORMATION ABOUT SENSITIVITY TO CHANGES IN SIGNIFICANT UNOBSERVABLE INPUTS

Discounted cash flow or similar modeling techniques are generally used to determine the recurring fair value measurements for Level 3 assets and liabilities. Use of these techniques requires determination of relevant inputs and assumptions, some of which represent significant unobservable inputs as indicated in the tables that follow. Accordingly, changes in these unobservable inputs may have a significant impact on fair value.

Certain of these unobservable inputs will (in isolation) have a directionally consistent impact on the fair value of the instrument for a given change in that input. Alternatively, the fair value of the instrument may move in an opposite direction for a given change in another input. Where multiple inputs are used within the valuation technique of an asset or liability, a change in one input in a certain direction may be offset by an opposite change in another input having a potentially muted impact to the overall fair value of that particular instrument. Additionally, a change in one unobservable input may result in a change to another unobservable input (that is, changes in certain inputs are interrelated with one another), which may counteract or magnify the fair value impact.

## Investment Securities

The fair values of predominantly all level 3 investment securities have consistent inputs, valuation techniques and correlation to changes in underlying inputs. The models used to determine fair value for these instruments use certain significant unobservable inputs within a discounted cash flow or market comparable pricing valuation technique. Such inputs generally include discount rate components including risk premiums, prepayment estimates, default estimates and loss severities.

These level 3 assets would decrease (increase) in value based upon an increase (decrease) in discount rates, defaults, or loss severities. Conversely, the fair value of these assets would generally increase (decrease) in value if the prepayment input were to increase (decrease).

Generally, a change in the assumption used for defaults is accompanied by a directionally similar change in the risk premium component of the discount rate (specifically, the portion related to credit risk) and a directionally opposite change in the assumption used for prepayments. Unobservable inputs for loss severities do not normally increase or decrease based on movements in the other significant unobservable inputs for these level 3 assets.

## Other Property Owned/Impaired Loans

Other property owned and impaired loans are valued using appraisals, market comparable sales, replacement costs and income and expense (cash flow) techniques. Certain unobservable inputs are used within these techniques to determine the level 3 fair value of these properties. The significant unobservable inputs are primarily sensitive only to industry, geographic and overall economic conditions, and/or specific attributes of each property.

## Inputs to Valuation Techniques

Management determines the Association's valuation policies and procedures. The Bank performs the majority of the Association's valuations, and its valuation processes are calibrated annually by an independent consultant. The fair value measurements are analyzed on a quarterly basis. For other valuations, documentation is obtained for third party information, such as pricing, and periodically evaluated alongside internal information and pricing that is available.

Quoted market prices are generally not available for certain System financial instruments, as described below. Accordingly fair values are based on judgments regarding anticipated cash flows, future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

**Quantitative Information about Recurring and Nonrecurring Level 3 Fair Value Measurements**

	<b>Fair Value</b>	<b>Valuation Technique(s)</b>	<b>Unobservable Input</b>	<b>Range</b>
Mission Related Investments	\$ 9,811	Discounted cash flow	Risk adjusted spread	2.00%–8.25%
Non-agency securities	\$ 16,768	Vendor priced		
Impaired loans and other property owned	\$ 92,351	Appraisal	Income and expense Comparable sales Replacement costs Comparability adjustments	* * * *

\* Ranges for this type of input are not useful because each collateral property is unique.

**Information about Other Financial Instrument Fair Value Measurements**

	<b>Valuation Technique(s)</b>	<b>Input</b>
Cash	Carrying Value	Par/Principal and appropriate interest yield
Loans	Discounted cash flow	Prepayment rates Probability of default Loss severity Annualized volatility
Mission-related investments	Discounted cash flow	Probability of default Risk adjusted discount rate
Asset-backed securities	Discounted cash flow	Prepayment rates Probability of default Loss severity
Other investments	Discounted cash flow	Probability of default Risk adjusted discount rate
Notes payable to AgFirst Farm Credit Bank	Discounted cash flow	Prepayment rates Probability of default Loss severity Annualized volatility
Subordinate debt payable to other Farm Credit institutions	Discounted cash flow	Probability of default Risk adjusted discount rate

The following table presents the carrying amounts and fair values of assets and liabilities that are measured at fair value on a recurring and nonrecurring basis, as well as, those financial instruments not measured at fair value, for each of the hierarchy levels at the period ended:

**NOTE 6 – COMMITMENTS AND CONTINGENT LIABILITIES**

Legal actions are pending against the Association in which claims for money damages are asserted. On the basis of information presently available, management and legal counsel are of the opinion that the ultimate liability, if any, from these actions, would not be material in relation to the financial position of the Association.

**NOTE 7 – BUSINESS COMBINATION**

Effective January 1, 2011, Farm Credit of North Florida, ACA, and Farm Credit of Southwest Florida, ACA, merged with and into Farm Credit of South Florida, ACA. Farm Credit of South Florida then changed its name to Farm Credit of Florida, ACA. As part of the merger, those Associations entered into an agreement with the Bank under which the Bank would provide limited financial assistance to the merged Association in the event of substantial further deterioration in the combined high risk asset portfolio of the merged Association. This agreement relates only to a finite pool of high risk assets of the merged Association existing at the merger date, which had a net book value at January 1, 2011 of \$250.0 million. At June 30, 2013, those assets had a net book value of \$87.8 million. This agreement with the Bank does not include losses that are sustained outside of the high risk asset pool. The agreement provides for limits on the merged Association's ability to make patronage distributions and certain other restrictions which are imposed if certain merged Association capital ratios fail to meet minimum established levels.

Under the financial assistance agreement, if specified minimum levels of capital allocated to the high risk asset pool are not maintained by the merged Association, the Bank would provide financial assistance as stipulated in the agreement. The assistance consists of three components.

First, the Bank would allow the Association to include up to \$10.1 million of Bank allocated stock owned by the merged Association in its capital ratio computations. Second, the Bank would redeem purchased stock held by the merged Association, up to the total amount outstanding, which was \$1.3 million at June 30, 2013, and the redeemed amount would be included in capital ratio computations by the merged Association. The third and final level of assistance would be a purchase by the Bank at the option of the merged Association of the high risk asset pool from the Association at net book value. Sale of the asset pool by the Association would be conditioned upon the purchase and or reallocation of Bank stock by the merged Association in an amount necessary to satisfy the capitalization requirement under the Bank's capitalization plan then in effect.

At June 30, 2013, capital allocated to the high risk asset pool failed to meet specified minimum levels due to losses in the pool from resolution efforts, provisions, and write-downs subsequent to the merger date. This resulted in the Association receiving assistance from the Bank under the agreement by allowing the merged Association to include in its capital ratio computations all of the total \$10.1 million of Bank allocated stock owned by the merged Association and by redeeming \$403 of the total \$1.3 million in purchased stock held by the merged Association. Based on projected performance, the merged Association is likely to continue to require assistance under the agreement during 2013.

## NOTE 8 - ACCUMULATED OTHER COMPREHENSIVE INCOME

## NOTE 9 – REGULATORY ENFORCEMENT MATTERS

As previously disclosed, on June 15, 2012 the Farm Credit Administration (FCA) entered into a written supervisory agreement with the Board of Directors of the Association. The written supervisory agreement requires the Association to take corrective actions and other actions with respect to certain areas of its operations, including board governance, director fiduciary duties and standards of conduct, board consultant functions, staffing and succession planning, asset quality, collateral risk, allowance for loan losses, internal audit, board policies, compliance with requirements of the Financial Assistance Agreement, and business planning and reporting. In addition, the Association is operating under Supervisory Conditions of Merger and must maintain compliance with all requirements and conditions.

Conditions and events that led to the need for this agreement include portfolio credit quality deterioration, inadequate management succession and human capital planning, perceived weaknesses in board governance, and reduced earnings.

As of August 7, 2013, the Association has taken action to correct the weaknesses in its board operations and policies, asset quality, collateral risk, capital contingency planning,

credit policy direction and guidance, internal audit and management reporting, has conducted a staffing study and has adopted a human capital and succession plan.

On May 20, 2013, FCA communicated in a letter to the Board that Board and management actions resulted in significant improvements in direction and control, particularly in the areas of human capital and succession planning, strategic planning, and board policy direction. The Association has achieved full compliance in the areas of board policies, management reporting and disclosure to shareholders.

As required by the supervisory agreement, the Board will continue engaging an independent consultant to provide advice in understanding and fulfilling its fiduciary responsibilities and to perform other advisory functions as specified in the agreement. Both the Board and Senior Management are committed to continuing the administration of the Association in a sound manner.

On November 5, 2012, FCA communicated in a letter to the Board that the Association was found to be in violation of its Supervisory Conditions of Merger and the Supervisory Agreement as a result of an internal cost allocation that did not occur as required by the Financial Assistance Agreement with the Bank. The internal cost allocation does not impact the

---

consolidated financial results presented in these financial statements. The Board took prompt corrective action by submitting a plan to the FCA to address the violation within 15 days of the date of the FCA letter and as of December 31, 2012, the Association had addressed the internal cost allocation violation.

The Association remained under written supervisory agreement as of the date of this report.

**NOTE 10 – SUBSEQUENT EVENTS**

The Association has evaluated subsequent events and has determined that there are none requiring disclosure through August 7, 2013, which is the date the financial statements were issued.
